1. Outside wall panel:

- Gypsum board 12.5mm (as loose material)
- Thermal insulation 50mm
- Laths 45x45mm
- Vapour barrier
- Thermal insulation 200mm
- Wooden frame 45x195mm
- Wind barrier 9mm
- Wind membrane
- Laths 28x45mm
- External cladding

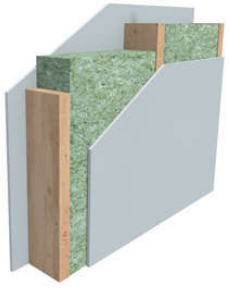
2. Inner wall panel:

Load bearing inner wall:

- Gypsum board 12.5mm
- Wooden frame 45x145mm
- Thermal insulation 150mm
- Gypsum board 12.5mm (as loose material)

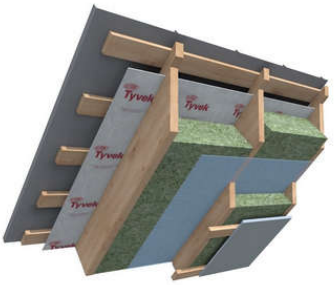
Inner wall

- Gypsum board 12.5mm
- Wooden frame 45x950mm
- Thermal insulation 100mm
- Gypsum board 12.5mm (as loose material)



4. Jumta panelis:

- Roof covering (according to project)
- Laths 28x70mm (according to roof covering type)
- Laths 28x45mm
- Wind membrane
- Wooden frame 45x245mm
- Thermal insulation 250mm
- Vapour barrier
- Laths 45x45mm
- Thermal insulation 50mm
- Laths 28x70mm
- Gypsum board 12.5mm (as loose material)



De vloerisolatie is bestemd voor houten vloeren en niet relevant in Nederland i.v.m. ons vochtige klimaat en daarmee samenhangende houtrot.
